Authors:	Schmidt, B.M.		
Journal:	The Crucible	Volume:	27
Number:	3	Pages:	7

Note:

Science Now!!, an annual science conference organized by Let's Talk Science, was hosted at the University of Western Ontario (UWO) in 1995 and offered fun, hands-on science and technology workshops for elementary school teachers. Teachers experimented with new teaching strategies, exchanged ideas about science and technology in elementary classrooms and discussed the future of science education. The Science Now!! Program offered teachers tools that could be used to stimulate the natural curiosity of students, improving their confidence and competence in teaching science at the elementary level.
