

Collaborative Curriculum Development Among Science Educators from Primary, Secondary and Tertiary Schools. CSSE (The Canadian Society for the Study of Education).

Research Area:		Year:	1997
Type of Publication:	Article	Keywords:	Science education, educators, university, elementary, high school, teachers, faculty, pedagogy, curriculum development, mutualism
Authors:	Bencze, J.L. Schmidt, B.M.		
Journal:	CSSE (The Canadian Society for the Study of Education)		

Note:

More complete mutualism, in matter of curriculum and pedagogy, among science educators in primary and secondary schools and university faculties of science and education appears to be feasible, under certain conditions (like participants recognizing that educators in other groups can contribute to aspects of their work). An important change that can come from shared curriculum development is a new set of priorities for science education outcomes
