

Native Youth Science Leadership Project: 1-11.

Research Area:	Uncategorized	Year:	1999
Type of Publication:	Article	Keywords:	First Nations, youth, science, partnerships, high school, science camp, hands-on, skills, leadership, attitude, education, community, personal development, professional development, outreach
Authors:	Waddilove, J.L.		
Pages:	1-11		
Month:	September		

Note:

Participants viewed their experience as very positive and demonstrated an improved level of understanding science and technology after experiencing hands-on science and technology program, while also exposing them to a university environment and science careers. Participants developed public speaking, teamwork and presentation skills that would improve their career options, while also making connections to Aboriginal communities and youth.
