

# Building Life Skills Through Science Education. ICWES12: 1-9.

Research Area:		Year:	2001
Type of Publication:	Article	Keywords:	Let's Talk Science, scientific literacy, hands-on, elementary school, teachers, students, workshops, science, attitudes, participation, development, life skills, engaging, data collection
Authors:	Clarke, C. Schmidt, B. Allison, D. Allison, P.		
Journal:	ICWES12		
Pages:	1-9		

Note:

Regular participation in Let's Talk Science science activities had a positive effect on teachers attitudes toward teaching science and students attitudes. Participation in the project led to a substantial increase in the development of student "life skills" including thinking through problems, creatively exploring different task approaches and identifying then accessing appropriate learning resources and opportunities.
